EDUCATION

Manipal Institute of Technology

B.Tech, Computer Science and Engineering; CGPA: 7.23/10

Bengaluru, Karnataka

Jun 2023 – Jul 2027

PROJECTS

AWS Student Performance Analytics Pipeline

Jul 2026 – Present

- Architected an event-driven data analytics pipeline on AWS (S3, Lambda, Python) that processed student performance data from 50+ source files with zero manual intervention.
- Automated Excel data ingestion from Amazon S3, cutting manual report-preparation time by roughly 90% for the analytics team.
- Generated automated summary reports on student performance using serverless AWS services, delivering insights to 10+ faculty/stakeholders on a weekly cadence.

Role-Based Task Management System

Jan 2026

- Designed a role-based task management system with 3 permission tiers (Admin, Manager, Member), enforcing secure, granular access control across the platform.
- Built RESTful APIs in Node.js and Express.js to handle task assignment, status updates, and user management, supporting 100+ concurrent users.
- Implemented monitoring dashboards and activity logs, improving administrative visibility into system usage and reducing issue-diagnosis time by 60%.
- Engineered a responsive React.js frontend, improving task-completion speed and cutting average clicks-to-complete by 40%.

MLOps Platform (Kubernetes-Based ML System)

Jan 2026 – Present

- Built a scalable MLOps platform automating training, deployment, and monitoring for 10+ ML models.
- Containerized and orchestrated ML services with Docker and Kubernetes, reducing model deployment time by 75% versus manual deployment.
- Developed 5 reusable pipelines for data processing, training, and evaluation, cutting new-experiment setup time by 70%.

INTERNSHIP EXPERIENCE

Software Trainee Intern

Appiness Interactive Pvt. Ltd.

Dec 2025 – Jan 2026

Bengaluru, Karnataka

- Developed REST APIs and authentication flows in Node.js and Express.js for a client-facing healthcare application used by 1.2 million users.
- Implemented role-based access control for enterprise applications, securing data access across 3 user roles.
- Collaborated with a team of 4 engineers to ship features for a client-facing healthcare application on schedule.

SKILLS

Languages: Java, C, JavaScript, SQL, Python

Frameworks & Technologies: Node.js, Express.js, React.js, Next.js, MongoDB

MLOps & Cloud: AWS (S3, Lambda), Kubernetes, Docker, MLflow, CI/CD (GitHub Actions)

Developer Tools: VS Code, Git, GitHub, Docker

Core Concepts: Data Structures & Algorithms, Operating Systems, DBMS, Object-Oriented Programming, REST APIs

CERTIFICATIONS

AWS Academy Graduate — Data Engineering, Amazon Web Services (Jun 2026)

EXTRACURRICULAR

Company Quarter Master Sergeant (CQMS)

National Cadet Corps (NCC)

Sep 2023 – Feb 2026

- Led a cadet unit of 120 members, building leadership, discipline, and teamwork through structured NCC training and drills.

Distance Running: Completed the Cubbon Classic 10K in 48:36 and set a 5K personal best of 22:55.
